Test Case	TC ID	Status	Type	Description
TAPQuestionariesTestcase197_Validate that when user starts TAP process with existing service line code = TERMITE, for Q6, choice code = "Yes", Q5 choice code = "Low", Add Photo and Add Notes and Click on Next button then Q7 subquestion will be displayed	TC-11720	New	Manual	Validate that when user starts TAP process with existing service line code = TERMITE, for Q6, choice code = "Yes", Q5 choice code = "Low", Add Photo and Add Notes and Click on Next button then Q7 subquestion will be displayed
TAPQuestionariesTestcase198_Validate that when user starts TAP process with existing service line code = TERMITE, for Q6, choice code = "No", then Q7 subquestion will be displayed	TC-11721	New	Manual	Validate that when user starts TAP process with existing service line code = TERMITE, for Q6, choice code = "No", then Q7 subquestion will be displayed
TAPQuestionariesTestcase199_Validate that when user starts TAP process with existing service line code = TERMITE, for Q6, choice code = "Yes", Q5 choice code = "High" then QP = "Please capture details with up to three photos and some notes*" will be displayed	TC-11722	New	Manual	Validate that when user starts TAP process with existing service line code = TERMITE, for Q6, choice code = "Yes", Q5 choice code = "High" then QP = "Please capture details with up to three photos and some notes*" will be displayed
TAPQuestionariesTestcase200_Validate that when user starts TAP process with existing service line code = TERMITE, for Q6, choice code = "Yes", Q5 choice code = "High" then B1 = "Add photo" and B2 = "Add notes" are displayed	TC-11723	New	Manual	Validate that when user starts TAP process with existing service line code = TERMITE, for Q6, choice code = "Yes", Q5 choice code = "High" then B1 = "Add photo" and B2 = "Add notes" are displayed
TAPQuestionariesTestcase201_Validate that when user starts TAP process with existing service line code = TERMITE, for Q6, choice code = "Yes", Q5 choice code = "High", capturing the photo and selecting the area enables the Add button and clicking the Add button submits the information	TC-11724	New	Manual	Validate that when user starts TAP process with existing service line code = TERMITE, for Q6, choice code = "Yes", Q5 choice code = "High", capturing the photo and selecting the area enables the Add button and clicking the Add button submits the information
TAPQuestionariesTestcase202_Validate that when user starts TAP process with existing service line code = TERMITE, for Q6, choice code = "Yes", Q5 choice code = "High", Add notes in the text section enables the Add button and the text can be edited and confirmed	TC-11725	New	Manual	Validate that when user starts TAP process with existing service line code = TERMITE, for Q6, choice code = "Yes", Q5 choice code = "High", Add notes in the text section enables the Add button and the text can be edited and confirmed
TAPQuestionariesTestcase203_Validate that when user starts TAP process with existing service line code = TERMITE, for Q6, choice code = "Yes", Q5 choice code = "High", Add Photo and Add Notes and Click on Next button then Q7 subquestion will be displayed	TC-11726	New	Manual	Validate that when user starts TAP process with existing service line code = TERMITE, for Q6, choice code = "Yes", Q5 choice code = "High", Add Photo and Add Notes and Click on Next button then Q7 subquestion will be displayed
TAPQuestionariesTestcase204_Validate that when user starts TAP process with existing service line code = TERMITE, for Q6, choice code = "No", then Q7 subquestion will be displayed	TC-11727	New	Manual	Validate that when user starts TAP process with existing service line code = TERMITE, for Q6, choice code = "No", then Q7 subquestion will be displayed
TAPQuestionariesTestcase205_Validate that when user starts TAP process with existing service line code = TERMITE, for Q7, choice code = "Yes", Q5 choice code = "Low" then QP = "Please capture details with up to three photos and some notes*" will be displayed	TC-11728	New	Manual	Validate that when user starts TAP process with existing service line code = TERMITE, for Q7, choice code = "Yes", Q5 choice code = "Low" then QP = "Please capture details with up to three photos and some notes*" will be displayed
TAPQuestionariesTestcase206_Validate that when user starts TAP process with existing service line code = TERMITE, for Q7, choice code = "Yes", Q5 choice code = "Low" then B1 = "Add photo" and B2 = "Add notes" are displayed	TC-11729	New	Manual	Validate that when user starts TAP process with existing service line code = TERMITE, for Q7, choice code = "Yes", Q5 choice code = "Low" then B1 = "Add photo" and B2 = "Add notes" are displayed
TAPQuestionariesTestcase207_Validate that when user starts TAP process with existing service line code = TERMITE, for Q7, choice code = "Yes", Q5 choice code = "Low", capturing the photo and selecting the area enables the Add button and clicking the Add button submits the information	TC-11730	New	Manual	Validate that when user starts TAP process with existing service line code = TERMITE, for Q7, choice code = "Yes", Q5 choice code = "Low", capturing the photo and selecting the area enables the Add button and clicking the Add button submits the information
TAPQuestionariesTestcase208_Validate that when user starts TAP process with existing service line code = TERMITE, for Q7, choice code = "Yes", Q5 choice code = "Low", Add notes in the text section enables the Add button and the text can be edited and confirmed	TC-11731	New	Manual	Validate that when user starts TAP process with existing service line code = TERMITE, for Q7, choice code = "Yes", Q5 choice code = "Low", Add notes in the text section enables the Add button and the text can be edited and confirmed
TAPQuestionariesTestcase209_Validate that when user starts TAP process with existing service line code = TERMITE, for Q7, choice code = "Yes", Q5 choice code = "Low", Add Photo and Add Notes and Click on Next button then the button "Finish TAP" will be displayed	TC-11732	New	Manual	Validate that when user starts TAP process with existing service line code = TERMITE, for Q7, choice code = "Yes", Q5 choice code = "Low", Add Photo and Add Notes and Click on Next button then the button "Finish TAP" will be displayed
TAPQuestionariesTestcase210_Validate that when user starts TAP process with existing service line code = TERMITE, for Q7, choice code = "Yes", Q5 choice code = "High" then QP = "Please capture details with up to three photos and some notes*" will be displayed	TC-11733	New	Manual	Validate that when user starts TAP process with existing service line code = TERMITE, for Q7, choice code = "Yes", Q5 choice code = "High" then QP = "Please capture details with up to three photos and some notes*" will be displayed
TAPQuestionariesTestcase211_Validate that when user starts TAP process with existing service line code = TERMITE, for Q7, choice code = "Yes", Q5 choice code = "High" then B1 = "Add photo" and B2 = "Add notes" are displayed	TC-11734	New	Manual	Validate that when user starts TAP process with existing service line code = TERMITE, for Q7, choice code = "Yes", Q5 choice code = "High" then B1 = "Add photo" and B2 = "Add notes" are displayed
TAPQuestionariesTestcase212_Validate that when user starts TAP process with existing service line code = TERMITE, for Q7, choice code = "Yes", Q5 choice code = "High", capturing the photo and selecting the area enables the Add button and clicking the Add button submits the information	TC-11735	New	Manual	Validate that when user starts TAP process with existing service line code = TERMITE, for Q7, choice code = "Yes", Q5 choice code = "High", capturing the photo and selecting the area enables the Add button and clicking the Add button submits the information
TAPQuestionariesTestcase213_Validate that when user starts TAP process with existing service line code = TERMITE, for Q7, choice code = "Yes", Q5 choice code = "High", Add notes in the text section enables the Add button and the text can be edited and confirmed	TC-11736	New	Manual	Validate that when user starts TAP process with existing service line code = TERMITE, for Q7, choice code = "Yes", Q5 choice code = "High", Add notes in the text section enables the Add button and the text can be edited and confirmed
TAPQuestionariesTestcase214_Validate that when user starts TAP process with existing service line code = TERMITE, for Q7, choice code = "Yes", Q5 choice code = "High", Add Photo and Add Notes and Click on Next button then the button "Finish TAP" will be displayed	TC-11737	New	Manual	Validate that when user starts TAP process with existing service line code = TERMITE, for Q7, choice code = "Yes", Q5 choice code = "High", Add Photo and Add Notes and Click on Next button then the button "Finish TAP" will be displayed
TAPQuestionariesTestcase215_Validate that when user starts TAP process with existing service line code = TERMITE, for Q7, choice code = "No", then the button "Finish TAP" will be displayed	TC-11738	New	Manual	Validate that when user starts TAP process with existing service line code = TERMITE, for Q7, choice code = "No", then the button "Finish TAP" will be displayed
TAPQuestionariesTestcase216_Validate that when user starts TAP process with existing service line code = TERMITE, for Q7, choice code = "Exterior Only", then the button "Finish TAP" will be displayed	TC-11739	New	Manual	Validate that when user starts TAP process with existing service line code = TERMITE, for Q7, choice code = "Exterior Only", then the button "Finish TAP" will be displayed
TAPQuestionariesTestcase217_Validate that when user starts TAP process with existing service line code = PEST+TERMITE, for Q1 and choice code = "Yes", Q2 subquestion will be displayed	TC-11740	New	Manual	Validate that when user starts TAP process with existing service line code = PEST+TERMITE, for Q1 and choice code = "Yes", Q2 subquestion will be displayed
TAPQuestionariesTestcase218_Validate that when user starts TAP process with existing service line code = PEST+TERMITE, for Q1 and choice code = "No", Q2 subquestion will be displayed	TC-11741	New	Manual	Validate that when user starts TAP process with existing service line code = PEST+TERMITE, for Q1 and choice code = "No", Q2 subquestion will be displayed
TAPQuestionariesTestcase219_Validate that when user starts TAP process with existing service line code = PEST+TERMITE, for Q2 and choice code = "Yes", Q5 subquestion will be displayed	TC-11742	New	Manual	Validate that when user starts TAP process with existing service line code = PEST+TERMITE, for Q2 and choice code = "Yes", Q5 subquestion will be displayed
TAPQuestionariesTestcase220_Validate that when user starts TAP process with existing service line code = PEST+TERMITE, for Q2 and choice code = "No", Q3 question will be displayed	TC-11743	New	Manual	Validate that when user starts TAP process with existing service line code = PEST+TERMITE, for Q2 and choice code = "No", Q3 question will be displayed
TAPQuestionariesTestcase221_Validate that when user starts TAP process with existing service line code = PEST+TERMITE, for Q2 and choice code = "Not Applicable", Q3 question will be displayed	TC-11744	New	Manual	Validate that when user starts TAP process with existing service line code = PEST+TERMITE, for Q2 and choice code = "Not Applicable", Q3 question will be displayed
TAPQuestionariesTestcase222_Validate that when user starts TAP process with existing service line code = PEST+TERMITE, for Q2, choice code = "Yes", Q5 choice code = "Low" then QP = "Please capture details with upto three photos and some notes*" will be displayed	TC-11745	New	Manual	Validate that when user starts TAP process with existing service line code = PEST+TERMITE, for Q2, choice code = "Yes", Q5 choice code = "Low" then QP = "Please capture details with upto three photos and some notes*" will be displayed
TAPQuestionariesTestcase223_Validate that when user starts TAP process with existing service line code = PEST+TERMITE, for Q2, choice code = "Yes", Q5 choice code = "Low" then B1 = "Add photo" and B2 = "Add notes" are displayed	TC-11746	New	Manual	Validate that when user starts TAP process with existing service line code = PEST+TERMITE, for Q2, choice code = "Yes", Q5 choice code = "Low" then B1 = "Add photo" and B2 = "Add notes" are displayed
TAPQuestionariesTestcase224_Validate that when user starts TAP process with existing service line code = PEST+TERMITE, for Q2, choice code = "Yes", Q5 choice code = "Low", capturing the photo and selecting the area enables the Add button and clicking the Add button submits the information	TC-11747	New	Manual	Validate that when user starts TAP process with existing service line code = PEST+TERMITE, for Q2, choice code = "Yes", Q5 choice code = "Low", capturing the photo and selecting the area enables the Add button and clicking the Add button submits the information
TAPQuestionariesTestcase225_Validate that when user starts TAP process with existing service line code = PEST+TERMITE, for Q2, choice code = "Yes", Q5 choice code = "Low", Add notes in the text section enables the Add button and the text can be edited and confirmed	TC-11748	New	Manual	Validate that when user starts TAP process with existing service line code = PEST+TERMITE, for Q2, choice code = "Yes", Q5 choice code = "Low", Add notes in the text section enables the Add button and the text can be edited and confirmed
TAPQuestionariesTestcase226_Validate that when user starts TAP process with existing service line code = PEST+TERMITE, for Q2, choice code = "Yes", Q5 choice code = "High" then QP = "Please capture details with up to three photos and some notes*" will be displayed	TC-11749	New	Manual	Validate that when user starts TAP process with existing service line code = PEST+TERMITE, for Q2, choice code = "Yes", Q5 choice code = "High" then QP = "Please capture details with up to three photos and some notes*" will be displayed
TAPQuestionariesTestcase227_Validate that when user starts TAP process with existing service line code = PEST+TERMITE, for Q2, choice code = "Yes", Q5 choice code = "High" then B1 = "Add photo" and B2 = "Add notes" are displayed	TC-11750	New	Manual	Validate that when user starts TAP process with existing service line code = PEST+TERMITE, for Q2, choice code = "Yes", Q5 choice code = "High" then B1 = "Add photo" and B2 = "Add notes" are displayed
TAPQuestionariesTestcase228_Validate that when user starts TAP process with existing service line code = PEST+TERMITE, for Q2, choice code = "Yes", Q5 choice code = "High", capturing the photo and selecting the area enables the Add button and clicking the Add button submits the information	TC-11751	New	Manual	Validate that when user starts TAP process with existing service line code = PEST+TERMITE, for Q2, choice code = "Yes", Q5 choice code = "High", capturing the photo and selecting the area enables the Add button and clicking the Add button submits the information
TAPQuestionariesTestcase229_Validate that when user starts TAP process with existing service line code = PEST+TERMITE, for Q2, choice code = "Yes", Q5 choice code = "High", Add notes in the text section enables the Add button and the text can be edited and confirmed	TC-11752	New	Manual	Validate that when user starts TAP process with existing service line code = PEST+TERMITE, for Q2, choice code = "Yes", Q5 choice code = "High", Add notes in the text section enables the Add button and the text can be edited and confirmed
TAPQuestionariesTestcase230_Validate that when user starts TAP process with existing service line code = PEST+TERMITE, for Q2, choice code = "Yes", Q5 choice code = "High", Add Photo and Add Notes and Click on Next button then Q3 subquestion will be displayed	TC-11753	New	Manual	Validate that when user starts TAP process with existing service line code = PEST+TERMITE, for Q2, choice code = "Yes", Q5 choice code = "High", Add Photo and Add Notes and Click on Next button then Q3 subquestion will be displayed
TAPQuestionariesTestcase231_Validate that when user starts TAP process with existing service line code = PEST+TERMITE, for Q2, choice code = "Yes", Q5 choice code = "Low", Add Photo and Add Notes and Click on Next button then Q3 subquestion will be displayed	TC-11754	New	Manual	Validate that when user starts TAP process with existing service line code = PEST+TERMITE, for Q2, choice code = "Yes", Q5 choice code = "Low", Add Photo and Add Notes and Click on Next button then Q3 subquestion will be displayed
TAPQuestionariesTestcase232_Validate that when user starts TAP process with existing service line code = PEST+TERMITE, for Q3 choice code = "Yes", Q5 choice code = "Low" then QP = "Please capture details with upto three photos and some notes*" will be displayed	TC-11755	New	Manual	Validate that when user starts TAP process with existing service line code = PEST+TERMITE, for Q3 choice code = "Yes", Q5 choice code = "Low" then QP = "Please capture details with upto three photos and some notes*" will be displayed
TAPQuestionariesTestcase233_Validate that when user starts TAP process with existing service line code = PEST+TERMITE, for Q3, choice code = "Yes", Q5 choice code = "Low" then B1 = "Add photo" and B2 = "Add notes" are displayed	TC-11756	New	Manual	Validate that when user starts TAP process with existing service line code = PEST+TERMITE, for Q3, choice code = "Yes", Q5 choice code = "Low" then B1 = "Add photo" and B2 = "Add notes" are displayed
TAPQuestionariesTestcase234_Validate that when user starts TAP process with existing service line code = PEST+TERMITE, for Q3, choice code = "Yes", Q5 choice code = "Low", capturing the photo and selecting the area enables the Add button and clicking the Add button submits the information	TC-11757	New	Manual	Validate that when user starts TAP process with existing service line code = PEST+TERMITE, for Q3, choice code = "Yes", Q5 choice code = "Low", capturing the photo and selecting the area enables the Add button and clicking the Add button submits the information
TAPQuestionariesTestcase235_Validate that when user starts TAP process with existing service line code = PEST+TERMITE, for Q3, choice code = "Yes", Q5 choice code = "Low", Add notes in the text section enables the Add button and the text can be edited and confirmed	TC-11758	New	Manual	Validate that when user starts TAP process with existing service line code = PEST+TERMITE, for Q3, choice code = "Yes", Q5 choice code = "Low", Add notes in the text section enables the Add button and the text can be edited and confirmed
TAPQuestionariesTestcase236_Validate that when user starts TAP process with existing service line code = PEST+TERMITE, for Q3 choice code = "Yes", Q5 choice code = "High" then QP = "Please capture details with up to three photos and some notes*" will be displayed	TC-11759	New	Manual	Validate that when user starts TAP process with existing service line code = PEST+TERMITE, for Q3 choice code = "Yes", Q5 choice code = "High" then QP = "Please capture details with up to three photos and some notes*" will be displayed
